## Kenya Children's Project – Kakamega

Based in Kakamega, Kenya's third largest city located approx. 30 miles from the equator in Western Kenya, this Children's Project is an organisation which does a fantastic work with orphans and abandoned children, currently based in the town.

We had the privilege of drilling a borehole for them at their new site on the edge of the town where they are building a new facility to care for and educate up to 200 children.

We drilled and equipped a borehole with a solar powered submersible pump which has been used for the production of bricks with the construction of additional new facilities would provide clean potable water for this new home.

The funding for this operation came from the 'Catch the Fire' church in Wembley, London who sponsored the project.
